

Introduction

One of your customers has mentioned that everybody receives a warning about an untrusted connection when connecting to their database through phpMyAdmin web interface.

Goal & Tasks

Analyze the given network capture and reply to the following 8 questions directly in the template from the resources section.

- Why does the customer receive a message about an untrusted connection?
 - What is the common name (CN) of the certificate?
 - What is the subject serial number of the used certificate?
- What are the credentials of the admin account?

Hint: Use the phpMyAdmin interface from the resources section to verify 5. What is the first and last name of the user with ID 1337?

Hint: You need the phpMyAdmin interface to answer this question 6. What should be done to prevent someone from decrypting the data even if they have access to a PCAP file and a matching private key from the server?

Submission

Completed PDF document with answers to the 6 questions mentioned in the goal section.
